Biopulsar-Reflexograph®

Nowadays many people have a holistic orientation and high expectations of the health, wellness and fitness industry. They aim to be perceived, understood, treated and consulted individually by the health counsellor on the multiple levels of body, mind and soul.

With the help of the Biopulsar-Reflexograph® Biofeedback System you can meet the demands of the modern customer more easily.

Biofeedback and Reflex Zones

The concept of the Biopulsar-Reflexograph® Electrodermal Biofeedback Screening is based on modern Computer hightech and the ancient knowledge of medical science.

Biofeedback is a recognized scientific method, where physical processes are brought into consciousness with technical assistance. With biofeedback the perception and conscious influence of body conditions can be specifically trained.

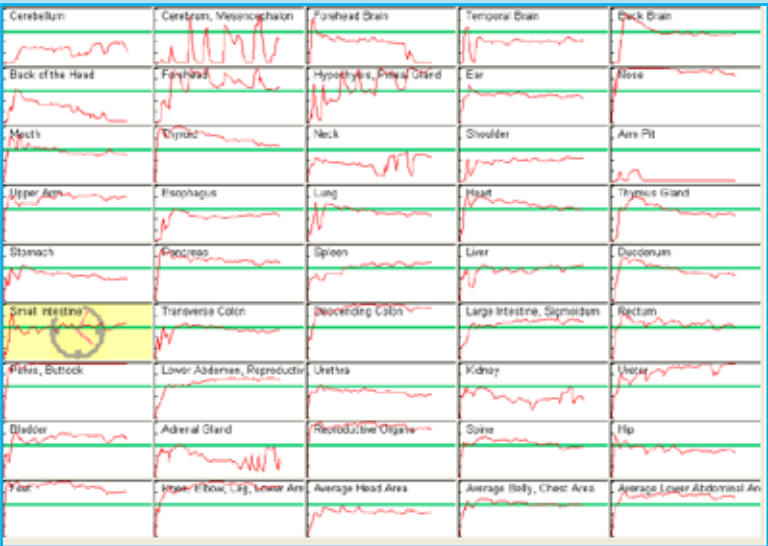

Reflex zones are areas on the skin, which have connections to internal organs, meridians and muscles. Indian and Chinese holistic healing sciences assume that the hand reflex zones are not only connected to the organs but also to the consciousness, the meridians, the energetic field (aura) and the chakras of a person.

The interpretation of the energetic state of a reflex zone is used to analyse the vital force and regenerative capacity of the inner organs and the psyche.

Sensor and Software

The Biopulsar-Reflexograph® Biofeedback System is based on the latest computer technology combined with the basic principles of ancient healing sciences.

The Biopulsar-Reflexograph® hand sensor is a receiver for high-resolution biomedical signals, which are taken from the reflex zones of the palm. Every 500 milliseconds (real-time) biodata is taken from at least 43 organ zones and transferred to the PC. There the data is processed and presented with the help of the software in various graphical displays.

LANGUAGES: see page 6

Great Holistic Therapy Assistant

This professional **Holistic Therapy Assistant Software** offers extensive information and therapy proposals for each of the 43 organ zones, in written texts, graphics and animations.

The various therapy data and instruction are easy to understand, supporting an efficiently quick and individualized professional consultation.

Contents:

- Instructions for a Biopulsar-Reflexograph® diagnosis
- General informations regarding organ and disease: organ description, organ function, disease patterns and diagnosis methods
- Traditional Chinese Medicine (TCM): General information on TCM medicine, meridian time, coupled meridian, meridian progression with animation, meridian function, guiding symptoms, TCM diagnosis, weakening factors, syndrome diagnostics
- References to teeth and spine
- Organ language with affirmations
- Phyto Therapy
- Homeopathy
- Schüssler Salts
- Flower Therapy - Bach Flowers and Flower Essences
- Nutritional proposals: General nutrition proposals and as to Ayurveda and TCM

AURASCOPE

Chromalive® Colour Therapy

This software offers detailed instructions for a colour light treatment of the different reflex zones of the face and the hands in written texts and graphics.

Contents:

- General organ information with graphics
- Essential oils supporting the colour treatment
- Image of the hand reflex zones and their measuring based balancing colours,
- Image of the face reflex zones and their measuring based balancing colours,
- Treatment instructions
- Information on the psychological organ language
- Positive thoughts and affirmations

PhysioFit Software

Based on your individual Biopulsar health assessment, the PhysioFit software will give you guidance as to how to increase and maintain the energy flow in the muscles as well as the meridians. The software contains text information and many pictures, graphics and animations.

Contents:

- General information: organ description, organ function, organ language and possible organ dysfunctions
- Traditional Chinese Medicine (TCM): Information regarding meridians and their energetic connection to the different muscles
- Switch-On Zones: Information regarding neurolymphatic muscle activating zones with proposals of supportive essential oils
- Gym machine workouts: For every organ zone different workouts are given in picture as well as description.
- Flexibility workouts: For every organ zone various flex trainings as well as workouts for flex machines are presented
- Training instructions with general information and interpretation method of the measuring data are given for a Biopulsar-based fitness training
